CEO: Claire TILLEKAERTS

Delegates: Hilda DEBIE & Liesbet HUYGE

The Flanders Investment & Trade agency promotes sustainable international business, in the interest of both Flanders-based companies and overseas enterprises.

Whatever sector you are involved in, Flanders Investment & Trade will help you establish contact with the Flemish companies you are looking for. This includes not only products or services you may be sourcing, but also various types of business relationships, from joint ventures to technology transfers.

At another level Flanders Investment & Trade enhances Flanders' position as the gateway to Europe for inward investors. The agency identifies, informs, advises and

supports overseas enterprises by establishing production and research facilities, contact centers, headquarters, logistics operations and the like in Flanders, the northern region of Belgium.

This broad focus on international entrepreneurship, involving outward trade as well as inward investments, requires not only a thorough knowledge of the Flemish economy, but also an extensive network outside of Flanders.

We have just that for you. Do visit our web-site and discover our worldwide network. With over 100 offices we are bound to be conveniently located near you, wherever you are.

Delegate: Carine BOONEN

The Government of Flanders created the program Flanders' Care as a driver for innovation. The mission statement of Flanders' Care is "to measurably improve the quality of care through innovation and responsible entrepreneurship". It has to ensure that by 2020, Flanders ranks among the top regions of Europe, and stands out as an economically sustainable and caring society.

Social and demographic developments are undoubtedly the greatest challenge for our care and welfare sector. In 2020, 21% of the population will be over the age of sixty-five; proportionally, the number of persons over

the age of eighty in this group is increasing even faster. This trend will have a major impact on our society, policy and the sustainability of our care system.

Flanders' Care views this development as an opportunity to guarantee the quality of care through innovation, and at the same time to create opportunities for entrepreneurs. Quality of care and industrial supply are closely intertwined. Entrepreneurship is crucial to provide the right solutions for the increasing demand in care needs and to keep people as long as they will at home.

EXPERTISE & EXHIBITORS

Specialization	Exhibitors
Clothing- Nursing articles	ANNE-LORE BY VAN HERCK
IVD medical devices	APDIA
Care homes and homecare platform	APERI
Dressings	BEDAL
Management software	BESCO

Keywords:

Intravenous therapy • Exit site shielding • Dressing
• Showering and washing • Patient autonomy

Activities:

Bedal produces and distributes the Bedalpatch, a single use transparent dressing to cover the intravenous exit site during washing or showering. The Bedalpatch allows the infusion line to stay connected during washing, while ensuring no water enters the exit site. This single use dressing is placed over the fixation dressing during washing, and is removed afterwards.

Products, Solutions and Services:

The Bedalpatch is a transparent dressing that allows a patient to wash, with a connected infusion line, while creating a watertight seal over the exit site.

Contact: Jeffrey DE WISPELAERE

Keywords:

Controllable • User friendly • Cost saving • Less pain • Hygienic and safe

Activities: Cryo-Human guides the natural recovery capacity of the human body after traumas, by specific heat extraction from the inflammation area. The main focus of Cryo-Human is on quality and results. Therefore, we run our own production in Belgium with high quality standard.

Products, Solutions and Services: Cryo-Human treatments limit the negative effects of the inflammation reaction and strengthens the effect of the body's own defense mechanism. Research has proven that Cryo-Human (in comparison with ice and coldpacks) penetrates deep, cools very efficient, lowers the CRP-value by 150%, makes the swelling disappear, speeds up the recovery process and brings down inflammation quickly.
